

Standard VS Busy file

Our pricing is based on an average 'business' of a file. We need to review your artwork to determine whether your file will take longer than the average file to cut. The images below show a 'standard' file vs a very busy file.

Standard file

- longer continuous lines
- no engraving
- large shapes

Busy file

- many shorter lines in different directions
- fair amount of engraving required (black lines)
- lots of smaller shapes

If when we review your artwork we determine that your file is particularly busy and will require extra time, we will be in touch before we cut your file to notify you of the additional charges.
